- HTML, CSS, JS, Python
- MySQL, SQLite
- OCI, GCP, Linux, Git

LANGUAGES

- English (Fluent)
- Finnish (Native)

PROFILE

I'm a 35-year-old Full-Stack Web Developer from Finland with three years of experience creating modern, user-friendly websites and applications. My expertise spans front-end and back-end development, cloud technologies, SEO and website performance optimization. Outside of work, I enjoy physical activities such as tennis and weightlifting, as well as boating.

WORK EXPERIENCE

Full Stack Developer & Project Manager (Independent Contractor)

2023 - Present

- Developed, deployed, published and maintained web applications using Python for backend logic and vanilla JavaScript/CSS for clean, framework-free frontends.
- Communicated directly with clients to define project goals, deliver progress updates, and ensure the final product matched their needs.
- Focused on speed and search visibility by implementing SEO optimizations, responsive designs, and clean database structures.

Diligent Data Services Data Management Assistant

2023-2025

- Utilized Google Sheets to organize and analyze background check data, including criminal record indicators, ensuring efficient and compliant review workflows.

Digital Currency Operations Manager

2016-2022

- Managed and configured specialized computing hardware infrastructure dedicated to digital currency mining and blockchain network validation.
- Maintained continuous system uptime by tracking real-time hardware metrics, optimizing system resources, and diagnostics to maximize performance efficiency.
- Utilized automated scripts and system utilities to manage baseline configurations, network routing pipelines, and automated recovery sequences.
